SUMMARY

Product designer specializing in AI-first products, currently founding designer at Hopscotch, an LLM gateway and router. I take products from brand identity to production code, using Claude Code to ship interfaces without waiting on engineering. My work spans AI agents, developer tools, generative AI, blockchain and B2B SaaS.

EXPERIENCE

Founding Designer
Aug 2026 – Present

Hopscotch | Toronto, Remote

- Lead all product design as the sole designer, across the developer platform, the marketing site and Hoppy.
- Designed the developer dashboard from first concept: analytics, logs, API keys, routing, spend controls and billing.
- Designed and built hopscotchlabs.ai end to end, including every page, the copy, a model catalog and live benchmarks.
- Built its design system on a headless CMS, so non-technical teammates publish ad landing pages on their own.
- Lead design of Hoppy, an AI agent product, from its mascot and brand to the full product UI.
- Build production React and Next.js components with Claude Code, so engineering ships from real code.

Product Designer
Jan 2026 – Sep 2026

Uniblock | Toronto, Remote

- Led an end-to-end rebrand covering identity, visual language and every product surface, from the API catalog to pricing.
- Redesigned the documentation experience, driving a 20% increase in time-on-page and a 10% reduction in bounce rate.
- Rebuilt onboarding to cut setup friction and improve developer activation, driving 30% more signups.
- Built a Claude Code component library with agent context, letting PMs ship working prototypes in 24 hours and helping close deals with Wealthsimple and Polymarket.

Product Designer
Apr 2025 – Present

Makiverse | Toronto, Remote

- Sole designer of a consumer generative AI platform for image, GIF, anime, manga and character generation.
- Designed the rewards and level system for engagement and retention, plus the storefront and subscription flows.
- Designed for people and for an AI agent that turns one prompt into characters, panels and finished manga.
- Design every screen in code with Claude Code for a seamless handoff to engineering.

Product Designer
Jul 2023 – Dec 2025

dApp Technology Inc | Toronto, Remote

- Designed NestEgg's end-to-end UX and NFT minting: 63K+ mints and 70K+ transactions, 7x the target KPIs.
- Designed Pump Pals Token Launcher, a no-code tool to launch ERC-20 tokens, configure unlocks and manage vesting.
- Designed the JOY Genesis handheld gaming device and its marketing site. The launch reached 280K+ impressions and grew its X following by 20,000.

Professional Esports Player & Team Manager
Jun 2021 – Oct 2023

FaZe Clan, Immortals & Complexity Gaming | Los Angeles

- Competed at the highest level of professional VALORANT, including VCT events and global qualifiers.
- As FaZe Clan's Team Manager, led player strategy and match operations for a top North American team.
- Ranked #1 globally in Spectre Divide in 2025.

SKILLS

UX & Strategy: Journey Mapping, Prototyping, Interaction Design, User Testing, Onboarding Optimization

Artificial Intelligence: AI Agents, Generative AI, Computer Vision, LLM Integration, AI Product Design, AI Product Strategy

Brand & Motion: Brand Identity, Mascot and Character Systems, SVG Animation, Motion Design

Design Tools: Figma, Paper, Framer, Spline (3D), Cursor, Affinity

Engineering: Claude Code, React, Next.js, Tailwind, Sanity CMS, Git & GitHub, Component Libraries, Design Systems, Responsive Layouts, Accessibility
